

Publikationsübersicht der Forschungsgruppe Tissue Engineering

- Axially vascularized tissue-engineered bone constructs retain their in vivo angiogenic and osteogenic capacity after high-dose irradiation.
Eweida A, Frisch O, Giordano FA, Fleckenstein J, Wenz F, Brockmann MA, Schulte M, Schmidt VJ, Kneser U, Harhaus L.
J Tissue Eng Regen Med. 2018 Feb;12(2):e657-e668. doi: 10.1002/term.2336. Epub 2017 Mar 22.
- Henn D, Abu-Halima M, Falkner F, Wermke D, Meme LG, Kuehner C, Keller A, Kneser U, Meese E, Schmidt VJ. Micro-RNA Regulated Pro-Angiogenic Signaling in Arteriovenous Loops in Patients with Combined Vascular and Soft Tissue Reconstructions – Revisiting the Nutrient Flap Concept. Plastic and Reconstructive Surgery 2018 Jul 2. doi: 10.1097/PRS.0000000000004750.
- Henn D, Wähmann MST, Horsch M, Hetjens S, Kremer T, Gazyakan E, Hirche C, Schmidt VJ, Kneser U. One-stage versus Two-stage Arteriovenous Loop Reconstructions – An Experience on 103 Cases from a Single Center. Plastic and Reconstructive Surgery 2018 (in press)
- Flow Induced Microvascular Network Formation of Therapeutic Relevant Arteriovenous (AV) Loop-Based Constructs in Response to Ionizing Radiation.
Schmidt VJ, Covi JM, Koepfle C, Hilgert JG, Polykandriotis E, Bigdeli AK, Distel LV, Horch RE, Kneser U.
Med Sci Monit. 2017 Feb 15;23:834-842.
- Schmidt VJ, Wietbrock JO, Leibig N, Hernekamp JF, Henn D, Radu C, Kneser U. Hemodynamically stimulated and in vivo generated axially vascularized soft tissue free flaps for closure of complex defects: Evaluation in a small animal model. Journal of Tissue Engineering and Regenerative Medicine. 2017 May 16. doi: 10.1002/term.2477
- Schmidt VJ, Wietbrock JO, Leibig N, Gloe T, Henn D, Hernekamp JF, Harhaus L, Kneser U. Collagen-Elastin and Collagen-Glycosaminoglycan Scaffolds Promote Distinct Patterns of Matrix Maturation and Axial Vascularization in AV Loop Based Soft Tissue Flaps. Annals of Plastic Surgery 2017, 79(1):92-100
- Flow-Induced Axial Vascularization: The Arteriovenous Loop in Angiogenesis and Tissue Engineering.
Leibig N, Wietbrock JO, Bigdeli AK, Horch RE, Kremer T, Kneser U, Schmidt VJ.
Plast Reconstr Surg. 2016 Oct;138(4):825-35. doi: 10.1097/PRS.0000000000002554. Review.
- Weis C, Covi JM, Hilgert JG, Leibig N, Arkudas A, Horch RE, Kneser U, Schmidt VJ. Automatic quantification of angiogenesis in 2D sections: a precise and timesaving approach. J Microsc. 2015 Apr 16. doi: 10.1111/jmi.12252
- Schmidt VJ, Hilgert JG, Covi JM, Leibig N, Wietbrock JO, Arkudas A, Polykandriotis E, de Wit C, Horch RE, Kneser U. Flow increase is decisive to initiate angiogenesis in veins exposed to altered hemodynamics. PLoS One. 2015 Jan 30;10(1):e0117407. doi: 10.1371
- Schmidt VJ, Hilgert JG, Covi JM, Weis C, Wietbrock JO, de Wit C, Horch RE, Kneser U. High flow conditions increase connexin43 expression in a rat arteriovenous and

angiogenic loop model. PLoS One. 2013 Nov 13;8(11):e78782. doi: 10.1371/journal.pone.0078782.

- Schmidt VJ, Jobs A, von Maltzahn J, Wörsdörfer P, Willecke K, de Wit C. Connexin45 is expressed in vascular smooth muscle but its function remains elusive. PLoS One. 2012;7(7):e42287.
- Connexin45 is expressed in vascular smooth muscle but its function remains elusive. Schmidt VJ, Jobs A, von Maltzahn J, Wörsdörfer P, Willecke K, de Wit C. PLoS One. 2012;7(7):e42287. doi: 10.1371/journal.pone.0042287. Epub 2012 Jul 27
- Defective Cx40 maintains Cx37 expression but intact Cx40 is crucial for conducted dilations irrespective of hypertension., Jobs A, Schmidt K, Schmidt VJ, Lübke-meier I, van Veen TA, Kurtz A, Willecke K, de Wit C., Hypertension. 2012 Dec;60(6):1422-9. doi: 10.1161/HYPERTENSIONAHA.112.201194. Epub 2012 Oct 22.
